ENGINEERING GEOLOGY

Contents Volume 49 (1998)

Research Papers

A combined hillslope hydrology/stability model for low-gradient clay slopes in the Italian Dolomites
M.G. Angeli, J. Buma, P. Gasparetto, A. Pasuto 1

Thalweg variability at bridges along a large karst river: the Suwannee River, Florida
J. Mossa, J. Konwinski 15

Anisotropic strength behaviour of a fissured overconsolidated clay in relation to Saalian glacial directions
F. Schokking 31

A graphical technique to predict slip along a pre-existing plane of weakness
S.A. Alaniz-Alvarez, Á.F. Nieto-Samaniego, G. Tolson 53

Liquefaction potential in the Lower Segura river basin (south-east Spain)
J. Delgado, C.L. Casado, P. Alfaro, J.J. Giner, A. Estévez 61

Book Reviews

Rock stress and its measurement
I.W. Farmer 81

Tropical Residual Soils
D.J. Williams 83

Research Papers

A numerical model to calculate land subsidence, applied at Hangu in China
T.R. Shearer 85

Liquid limit and the temperature sensitivity of clays
I. Jefferson, C.D.F. Rogers 95

Stability analysis of existing slopes considering uncertainty
C.H. Juang, Y.-Y. Jhi, D.-H. Lee 111

Engineering geosciences and military operations
G.A. Kiersch 123

Special Issue

Computational Methods in Engineering Geology

R. Pusch (Editor)

Session 1: Rock Performance

Categorization of discontinuities for conceptual description of rock hosting repositories for hazardous waste
R. Pusch 177

Visualization of the El Berrocal granite: application to rock engineering
M.J. White 185

Implications of rock structure on the performance in the near field of a nuclear waste repository
J. Andersson, P. Robinson, M. Impey 195

Strain parameters of discontinuities in rock for finite element calculation
R. Pusch, L. Börgesson 201

A new approach to numerical method of modelling geological processes and rock engineering problems—continuum to discontinuum and linearity to nonlinearity
C.A. Tang, W.T. Yang, Y.F. Fu, X.H. Xu 207

Acceptance of emplacement hole positions – stage 1 thermomechanical study
H. Hökmark 215

Thermoelastic stress due to a rectangular heat source in a semi-infinite medium. Presentation of an analytical solution
J. Claesson, T. Probert 223
Practical visualization of rock structure
R. Pusch 231

Session 2: Material Modelling
Improvement in the interpretation of stress measurements by use of the overcoring method: development of a new approach
K. Fouial, M. Alheib, H. Baroudi, C. Trentsaux 239
The introduction of neural network system and its applications in rock engineering
Y. Huang, S. Wänstedt 253
Identification of the governing parameters related to rock indentation depth by using similarity analysis
S.-Q Kou, Y. Huang, X.-C. Tan, P.-A. Lindqvist 261
Crack modelling of concrete, rock and soil with inner softening bands
R. Tano, M. Klisinski 271
Application of the DDM and fracture mechanics model on the simulation of rock breakage by mechanical tools
X.C. Tan, S.Q. Kou, P.-A. Lindqvist 277
Constitutive model with time-dependent deformations
A. Krogsbøll 285
The stress–strain behaviour of rock material related to fracture under compression
C. Li, R. Prikryl, E. Nordlund 293
Micro-sequential contour blasting—how does it influence the surrounding rock mass?
A.P. Rustan 303

Session 3: Applied Numerical Methods
A hybrid discrete-continuum approach to model hydro-mechanical behaviour of jointed rocks
L. Wei, J.A. Hudson 317
Numerical study of the performance of tunnel plugs
H. Hökmark 327
Three-dimensional analysis of groundwater flow in neogene rocks at the Rokkasho low-level radioactive waste disposal center, Japan
T. Sasaki, N. Hashimoto, T. Nakato, T. Shiraishi, K. Yajima, T. Hishiya 337
Comparison of vertical and horizontal deposition hole concept for disposal of radioactive waste based on rock mechanical in situ stress–strength analyses
P.J. Tolppanen, E.J.W. Johansson, R. Riekkola, J.-P. Salo 345
Finite element analysis of a pilot gas storage in rock cavern under high pressure
M. Lu 353
Finite element models for use in mechanics including geological engineering
R.S. Weston, T. Cedell 363
Formulation of discontinuous deformation analysis (DDA)—an implicit discrete element model for block systems
L. Jing 371
